

No. 40 | As promised: details about the winter semester

Berlin, September 30, 2021

Dear students, dear teachers,

In our last Coronamail we announced that we would send you information about practice and teaching in the winter semester before the start of the new semester on October 1st. Here it is!

- [Regulations for teaching](#)
- [Regulations for student practice](#)

We would draw your attention to two points:

1. Those of you who have neither been vaccinated nor are recovered (2 G) require a current test to enter the university. Today in the university management we decided that there will be a limited possibility to do a quick test under supervision using kits that you have brought with you in order to receive a certificate. This is only valid for the university.
We will set up this service from October 11th, when the free rapid tests of the State of Berlin are discontinued.
2. And another piece of information for all of you who have been vaccinated with a vaccine not approved in the EU: The RKI writes on its website that, taking into account the age-appropriate vaccination recommendations, a new series of vaccinations with a vaccine approved by the European approval authority is necessary. This gives you vaccination status in the EU. Here is the list: https://www.pei.de/DE/newsroom/dossier/coronavirus/coronavirus-inhalt.html?nn=169730&cms_pos=3
If this affects you, please be sure to seek medical advice.

For all questions about vaccination, the corona management is still available at corona@adm.hfm-berlin.de !

Best regards,

Your School management
